This document outlines the following information:

Floor 18 is a mechanical floor servicing the entire building along with a structural core for the tower portion of the building. Under the current zoning regulations, heights for stories are not defined nor limited thus allowing for unrestricted heights. Further, structures using "tower" regulations do not have zoning height restrictions. Therefore, the building may rise to any height (which could be created by large mechanical spaces OR, for example, 20'-30' floor heights per habitable/occupiable stories). As such, this tower is within the requirements of the Zoning Resolution of the City of New York for all of its heights.
